

Closing the gap

Welding & Pipefitting Hub

Driven by industry
Connected by Members

CATCH
APPRENTICESHIPS

Expanding our facilities to meet and exceed industry ambitions.

A Multi-service,
member led
organisation situated in
the heart of industry.

CATCH started as a membership organisation for the Humber's energy intensive industries and their suppliers back in 1999. Since this time, we have developed our services to support our members by building strong partnerships with regulators, policy makers and public sector organisations at local, regional and national level. Our famous CATCH training facilities and CATCH Skills department have grown and strengthened to become a beacon for the region's commitment to supporting the process, energy, engineering and renewable sectors in the Lincolnshire, Yorkshire and Humber regions and beyond.

Our strategic investment in high quality, industry leading facilities over the past decade champions industrial skills. Focused on real world, people-centered teaching that supports the need of industry.

Successfully launching CATCH Apprenticeship in 2021 with our tailored, specialist, technical employer focused programmes not only cemented our position as the leading provider for the process industries, but also the fastest growing,

Training highly skilled craftspeople for a Low Carbon Future - together.

CATCH will be expanding our apprenticeship provision in 2023 with the introduction of premium welding and pipefitting pathways to complement our offer in process operations, mechanical, electrical & instrumentation standards. And we would like to invite you to be a integral part of it.

The CATCH Welding & Pipefitting Hub is an employer led project to ensure that our region has the right level of skills to meet the demand not only of existing projects in the process industry sector, but to enable the UK to deliver the mega-scale engineering constructions projects that industrial decarbonisation of our industry requires.

The hub will have 4 main capabilities:

- Schools STEM Engagement
- Level 3 Apprenticeship training
- Upskilling existing employees in industry
- Training programmes to retrain new entrants to industry

Through sponsorship, we invite members and key stakeholders to support this step change in our delivery. Contributions are invited from partners to support the refit of our original workshop which was opened in 2006. Expanding our apprenticeship provision builds on existing regional capacity in these important trades.

Not only will you be helping to provide essential practical resources, you will also be building a long-lasting founding relationship through brand recognition and awareness in the industry.

WELDING BENCHES
TIG WELDING SETS
MIG/MAG WELDING SETS
BURNING BENCHES
PEDESTAL DRILL
BAND SAW
GRINDER
PIPE THREADER
LIFTING EQUIPMENT
MAG DRILL

HAND THREADERS
PLATE BEVELLER
GUILLOTINE

READY TO
CONTRIBUTE?

Please return the form to lesley.pickard@catchuk.org

If you would like to come and visit the facilities to talk to us about these sponsorship opportunities, please contact 01469 552828

2023: Your generous contributions will support purchase and fit out of brand new state of the art equipment

2024: We anticipate using contributions as match funding to the NEL UK Shared Prosperity Funding which offers 40% grant rate on capital projects – so for each £600 private sector match we can spend £1000 on the facilities.
