

Clean Energy Jobs Plan:

“Examples of best practice such as CATCH, an employer-led training provider in the Humber, co-funded by industry and government, which supports reskilling in hydrogen, carbon capture, utilisation and storage, and process operation”

Oct 2025

CATCH expansion co-funders:

Clean Energy Jobs Plan:

Deliverable:	CATCH Alignment:
<p>✓</p> <p>Deliver the pipeline of skilled workers</p>	<p>Operating as a Technical Excellence College model - providing apprenticeships in 11 priority occupations.</p> <p>Real-world facilities – accessible for all learners. Expert delivery – award-winning, ex-industry tutors. Pipeline focused – Bootcamps, pre-apprenticeships and higher Level 4 HNC courses.</p>
<p>✓</p> <p>Harness the potential of those already in the workforce</p>	<p>Workforce development – short courses for upskilling and reskilling. Regional collaboration – delivering LSIP projects and supporting the regional skills pilot. National engagement – involved in the OCEJ Training Guarantee and Armed Forces Covenant (Silver). Industry-led delivery – place and sector-based training</p>
<p>✓</p> <p>To ensure clean energy jobs are always good jobs</p>	<p>Strong industry collaboration – investors, networks, and trusted voice in the sector. Community and schools outreach – dedicated team connecting locally. Inclusive opportunities – Women in Engineering events and EDIB initiatives. Knowledge sharing – member networks and engagement with trade unions.</p>
<p>✓</p> <p>To ensure that the clean energy transition delivers good jobs in every part of the UK</p>	<p>Regional leadership – Humber Industrial Cluster Plan Partner Local governance – board and group representation, including Humber Energy Board and local councils. Industrial expertise – guided by a board inclusive of supply chain, education, and local authorities.</p>
